- C++

WORK EXPERIENCE

ALFRED TECHNOLOGIES

Full Stack Developer Intern

Nov 2020 - May 2021

- Developed a language learning website with user and admin panels. Designed and Developed the backend using Nodejs. User can learn a new language with a fun game like teaching technique called Leitners system and can test their knowledge with various quiz/test. Key featured developed by me in backend are jwt authentication with refresh tokens, tracking user progress along with the leitners game and the complete admin panel.
- Admin panel (Frontend) was developed using ReactJs where admin could add/edit words, languages, levels, quiz questions, manage moderators and users. For user interface(Frontend) i simply fixed few bugs and developed some pages. Stack used MERN

NELUMBUS TECHNOLOGIES

Full Stack Developer Intern

Sept 2020 - Dec 2020

- Redefined and developed the website's event and course management system. It was a course based learning platform. Majorly worked on the admin side with PHP. Developed a exam like portal for students with both user and admin side. Stack used PHP and MySQL.
- I was also asked to work on an food delivery app as well where i developed the backend for food delivery system using Nodejs. And developed various screens in Flutter. The screens were just layouts for food details and order details profiles, etc. Stack used Nodejs and Flutter
